REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Applicant claims an electrochemical cell assembly comprising:
a plurality of separate elements; at least one groove network extending through the electrochemical cell assembly and including at least one filling port for the at least one groove network connected to the groove network so as to be in fluid communication therewith; and a seal within each groove network that has been formed in place after assembly of said separate elements, wherein the seal provides a barrier between at least two of said separate elements to define a chamber for a fluid for operation of the electrochemical cell assembly; wherein the seal comprises at least one of:
an ethylene/acrylic polymer; a fluoro elastomer; an Ethylene Propylene Terpolymer; a flexible or rigid epoxy resin; and a thermoplastic elastomer.

In the prior art of record, Schmid et al., U.S. Pat. No. 6,080,503, teach an electrochemical/fuel cell assembly comprising a plurality of separate elements, at least one groove network element extending through the fuel cell assembly, wherein the seal provides a barrier between at least two of the elements to define a chamber for a fluid for operation of the fuel cell wherein the seal comprises an elastomeric material flexible or rigid epoxy resins.

However, the prior art of record, taken either alone or in combination, fails to disclose nor render obvious at least one groove network extending through the electrochemical cell assembly and including at least one filling port for the at least one
